The Wallace B. Flint is credited with having made the best time of any of the vessels that came into port yesterday and today. She made the trip in twenty days, and brought large general cargo besides a number of good looking horses.

The installation of an electric lightng plant in the ship Roderick Dhu by er owners, makes her the only sailing vessel affort at the present time so far as known, that is thus fitted up with incandescent lights. She is an American bark and is bound for Hawalian ports under the command of Captain Johnson.. In addition to the above she was fitted up with a cold storage plant something over a year ago.

The steamship Doric of the O. & O. S. S. Company cast off her lines from the Mail dock last evening snortly after five o'clock, and proceeded on her way to the Orient. The vessel was six days and seventeen hours coming down from the Coast which is her schedule time. It is possible however for her to make better time by using more roal. The water front is quite busy at the present time which is in strong contrast with the condition that existed a week ago. Vessels from various parts are coming in daily, and discharging their heavy cargoes at the various wharves. The puffing of the engines and shouting of the natives with myriads of trucks coming and going with goods consigned to various agents and houses, strikes the average tenderfoot with the importance of Horelate from a commercial standpoint.
